Subject: SB 35

I respectfully submit my testimony to the committee The time allocated to the bill was generous
In summary, I have experienced chaos and confusion when I approach various entities with my service dog. As a physical therapist in private practice I experience first hand various disability organizations populations done pets with service dog vests and say it is a service dog. Without a top down definition and recognition of service dogs as a medical device necessary for life, there are pods of organizations controlling the system
When SB 35 passes, it will provide a gateway for local, state and federal understanding.
Putting a vest on a pet is like parking in a handicap spot without a disability.
